

TCPOS.net

Global
Point of Sale
Management
Solution for
Bars, Restaurants
and Late Night
Venues

Whatever your market, you need to continuously focus on your customer's satisfaction while simultaneously streamlining your operations. PAR's TCPOS.net provides you with a complete set of tools that will help you to promote and grow your business and make sure you retain existing customers - resulting in maximum profit.

PAR's TCPOS software utilises Microsoft®'s .NET architecture so you no longer need a PC at each location. A single central server maintains one database and, therefore, one version of the truth. Thanks to TCPOS.net's unique Visibility Criteria, each business category within the organisation can be treated as a separate entity, with user defined viewing of corporate information.

TCPOS.net offers organisations an unmatched opportunity for centralised configuration and reporting. You can monitor the status of tills on your estate at a glance; distribute new menus remotely and run thorough analysis on virtually any permutation of data and locations.

These functionalities, combined with the PAR hardware platform, proven in the harshest of restaurant conditions, will offer you the best return on investment, year after year.

Features Highlights

- ▶ A scalable, multi-site and multi-concept solution, with the choice between Microsoft® or Oracle® SQL databases
- ▶ Visibility Criteria allow a superior level of access management, automatic price recognition based on time or events, ...
- ▶ Centralised configuration : POS set-up, Menu Offerings, Price Levels...
- ▶ Sales analysis based on time, items, outlets, operators, promotions, ...
- ▶ Complete management of all food activities in bars and restaurants

We know what's on your mind...

In order to compete in a crowded market place, managing information becomes critical as a deciding factor in what to promote and where to focus your attention. Your managers' job is not to spend hours configuring their POS system or analysing transactional data; no more than yours is to serve drinks or to type orders on the POS itself. That's why TCPOS.net has comprehensive toolkits for both your headquarters and venues, enabling you to orchestrate your global operations, and allow every individual in your company to focus on what they do best. So give your employees the right tools to provide customer satisfaction through efficient service and focus on what you are unique at doing : running a company.

Focus on your job. Not on IT.

Geared to Service

No downtime for more satisfaction.

One of TCPOS.Net's unique features is the design of its FrontEnd module. Built-in integrity allows your terminals to function totally independently of the network, and restores automatically once the issue is fixed. This, combined with functionalities such as **Layaway, Fast Login or Quick Cash** will naturally increase your speed of service, providing improved customer's satisfaction.

Natural Seller

Happy Hours and Promotions.

When, where, what and how : configuring parameters of your promotion couldn't be simpler! From Happy Hours to "Buy one, get one Free", doing marketing has never been so easy. Once your promotion is sent to your tills you can evaluate its success at **any time**, by looking at how many of a promoted item have been sold, with TCPOS.net's **Transaction Analyser**.

Awarded "Best Company"... by our customers!

With over 45,000 installations in more than 100 countries and a global customer service infrastructure, PAR has built a reputation for excellence.

Our strong focus on customer satisfaction has resulted in PAR being regularly ranked amongst the **Best Companies for Total Cost of Ownership, Return On Investment**

and Customer Service in HT Magazine's POS Scoreboard Survey. PAR consistently meets and exceeds the rigorous ISO 9001:2000 certification standards for its innovative products, services,

processes, materials and systems. Your satisfaction is our first priority. PAR's solutions serve you better... so you can better serve your customers.

Powerful. Simple. Reliable.

TCPOS.

Thrifty

Unequaled Total Cost of Ownership.

TCPOS.net's two tier architecture eliminates the need for a server at the site level, dramatically reducing your technology investment. Software updates or roll-outs are made remotely, eliminating costly site interventions. TCPOS.net runs equally with a Microsoft® or Oracle® SQL database, ensuring compatibility with your existing IT environment, saving even more money by optimising your investment.

Incredibly Flexible

The Visibility Criteria do it all.

TCPOS.net is a true Point-of-Sale Global Management solution. It can maintain a single database for the entire enterprise and restrict access and viewing to specific regions, locations and outlets. Visibility Criteria allow you to implement a high level of security in accessing Management Information. Analysis reports can be specified in a finite way and the information generated has absolute significance to what is required.
