

# TCPOS.net

## Global Point of Sale Management for the Institutional Foodservice Industry

**Whatever your market**, you need to continuously focus on your customer's satisfaction while simultaneously streamlining your operations. PAR's TCPOS.Net provides you with a complete set of tools that will help you to promote and grow your business and make sure you retain existing customers - resulting in maximum profit.

PAR's TCPOS software utilises Microsoft®'s .NET architecture so you no longer need a PC at each location. A single central server maintains one database and, therefore, one version of the truth. Thanks to TCPOS.Net's unique Visibility Criteria, each business category within the organisation can be treated as a separate entity, with user defined viewing of corporate information.

TCPOS.Net offers organisations an unmatched opportunity for centralised configuration and reporting. You can monitor the status of tills on your estate at a glance; distribute new menus remotely and run thorough analysis on virtually any permutation of data and locations.

These functionalities, combined with the PAR hardware platform, proven in the harshest of restaurant conditions, will offer you the best return on investment, year after year.

## Features Highlights

- ▶ A scalable, multi-site and multi-concept solution, with the choice between Microsoft® or Oracle® SQL databases
- ▶ Visibility Criteria allow a superior level of access management, automatic price recognition based on time or events, ...
- ▶ An outstanding list of third party systems interfaces such as ERPs, Stock Control or Vending Machines, for superior integration
- ▶ Extensive Account Management and types of payment management, allowing you to use prepayment or credit on any type of supports such as SmartCards, badges, ...
- ▶ An intuitive datacube for precise reporting so you can see clearly the trends that are hidden in the mass of your transactional data

TCPOS.net brings a simple answer to the most complex restaurant environments. More than bringing you enterprise toolkits specific to the Institutional Foodservice Industry, it has you benefit from the best of new technologies. Quintessence of the most powerful development techniques available on the market, TCPOS.net offers you an extremely flexible solution that represents the landmark for global management software for the next ten years... Available for you today.

## Simple solutions for the most

## complex restaurant environments

### Geared for Service

#### No downtime for more satisfaction.

One of TCPOS.Net's unique features is the design of its FrontEnd module. Built-in integrity allows your terminals to function totally independently of the network, and restores automatically once the issue is fixed. This, combined with functionalities such as Quick Cash and Multi-Payment methods will naturally increase your speed of service, providing improved customer's satisfaction.

### Open

#### You will need it, TCPOS made it.

TCPOS.net offers you an outstanding list of third party interfaces, one or two ways, to systems such as Accounting, Stock Control, Vending Machines, Bank Notes or Credit Cards Reloading Terminals, Scales, EFT systems... TCPOS.net's unique development environment allows you to interface it with Software or Hardware solutions that correspond to your service offering.

### Awarded "Best Company"... by our customers!

**With over 45,000 installations in more than 100 countries and a global customer service infrastructure, PAR has built a reputation for excellence.**

Our strong focus on customer satisfaction has resulted in PAR being regularly ranked amongst the **Best Companies for Total Cost of Ownership, Return On Investment**

**and Customer Service** in HT Magazine's POS

Scoreboard Survey. PAR consistently meets and exceeds the rigorous ISO 9001:2000 certification standards for its innovative products, services,

processes, materials and systems. Your satisfaction is our first priority. PAR's solutions serve you better... so you can better serve your customers.

### ParTech, Inc.

### Thrifty

#### Unequaled Total Cost of Ownership.

TCPOS.net's two tier architecture eliminates the need for a server at the site level, dramatically reducing your technology investment. Software updates or roll-outs are made remotely, eliminating costly site interventions. TCPOS.net runs equally with a Microsoft® or Oracle® SQL database, ensuring compatibility with your existing IT environment, saving even more money by optimising your investment.

### Incredibly Flexible

#### The way you need it.

Because it has been designed for your specific industry, TCPOS.net allows you to manage different till types and restaurant concepts; reloading and vending devices; to block access to the system's information according to hierarchic levels or personalised criterion; manage enterprise different agreements and access fees... All of this from one a single server, with the choice between Microsoft® or Oracle® SQL databases
